# WEBRelay™ 10

Quick Start Guide

Basic Setup Steps:

(1) Connect unit to power and network only.
(Power connections require 0.250" tab connectors.)
(2) Set up a computer on the same network to configure WebRelay-10™. To do this, set the IP address of the computer to 192.168.1.50 with a netmask of 255.255.255.0.
(3) Configure WebRelay-10™ using a web browser. Do this by pointing the browser to http://192.168.1.2/setup.html.
Username is admin (all lower case).
Password is webrelay (all lower case).
(4) Set the permanent IP address in the configuration page. Restart WebRelay-10™ (remove power, re-apply power).
After restarting the unit, set your computer back to its original settings and access WebRelay-10™ at its new IP address.
(5) Connect relay contacts.
(Relay connections require 0.250" tab connectors.)
